

Editorial Notes

Journal of Physical Science Vol. 29, Supp. 2 is a special issue resulting from the 6th International Conference on Education, Concept and Application of Green Technology by Engineering International Committee (EIC 2017) of Engineering Faculty, Universitas Negeri Semarang (UNNES), Indonesia, organised on 11 October 2017. This conference provided a platform for academics, researchers, professionals, industries and other stakeholders from all over the world to explore and share their experiences, information, research results, exchange state-of-the-art findings and views. It also discussed various cutting-edge issues that are related to the theme of this conference. Moreover, this conference provides a discussion forum to establish business or research relations and to find global partners for future collaboration.

The selected articles cover the main aspects of green technology field that includes the concept and application in mechanical, chemical, civil and electrical engineering.

The publication of this *Journal of Physical Science* special issue has been realised through the support by the Engineering Faculty of UNNES, the committee of the conference and the publisher, Penerbit Universiti Sains Malaysia.
